

MOBILITA ERASMUS+ CROATIA SPLIT

Ondrej Hlavatý IV.CP

HOW DID I JOIN TO PROJECT?

I got involved in the Erasmus+ student project after completing tests from ENGLISH and SPECIAL SUBJECTS and successfully passing the selection process. Through these steps, I demonstrated my abilities and determination to participate in this educational program.

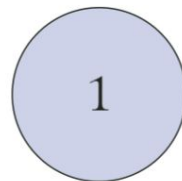

CROATIA

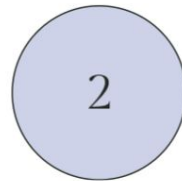

- is state on the shores of the Adriatic Sea
- has borders with 6 countries : Slovenia, Hungary, Serbia, Bosnia and Herzegovina and Montenegro.
- capital city is Zagreb.
- spans 56,594 square kilometers and has a population of nearly 3.9 million.

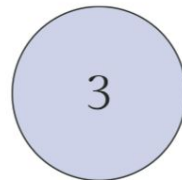

ROUTE TO CROATIA

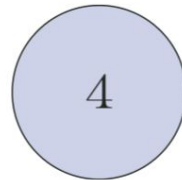

TRAIN - Michalovce to Košice

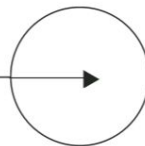

TRAIN - Košice to Budapest

BUS - Budapest to Zagreb

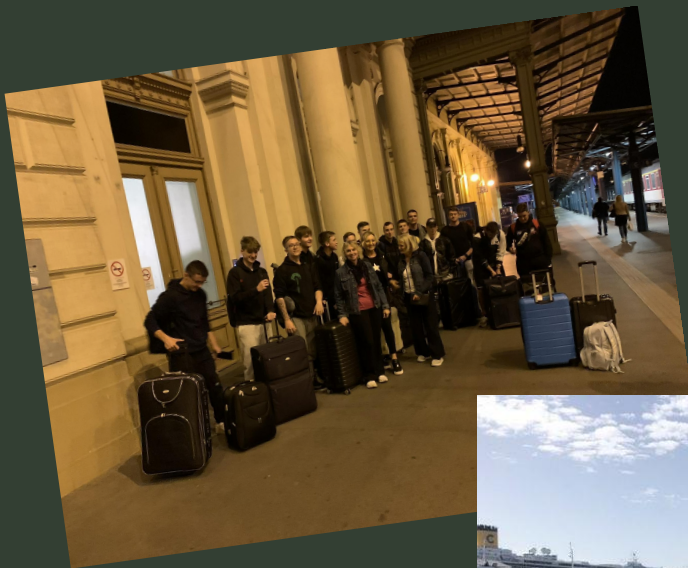

BUS - Zagreb to Split

FIRST DAY

- We arrived in the city of Split and went to check into our accommodation and were filled with anticipation and a sense of adventure. Navigating through the charming streets, we explored the local culture and traditions. It was a blend of discovery and practical arrangements, marking the beginning of our memorable stay in Split.

NEXT DAY

- We went to familiarize ourselves with the place where we would be practicing and studying, and to get to know our mentors. We took the opportunity to meet our mentors, discuss expectations, and establish a connection with the professionals who would be guiding us during our practical experience.

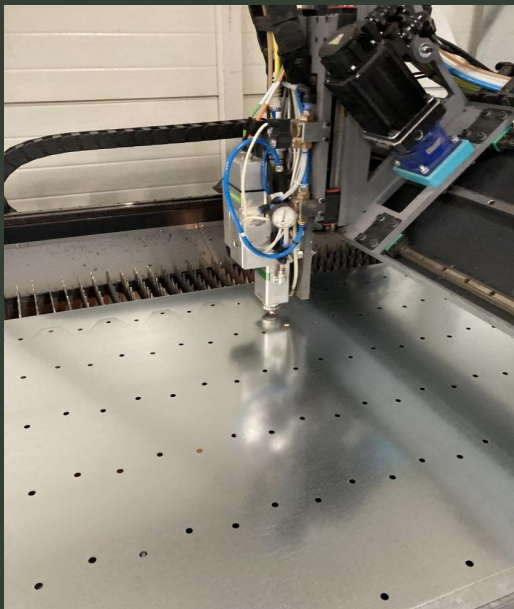

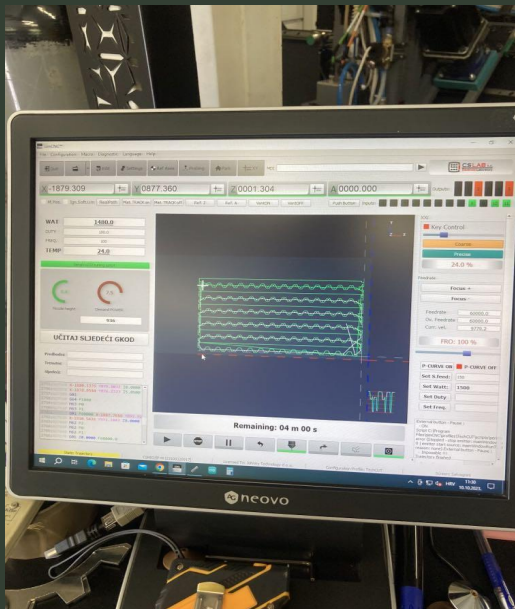

WORK DAY

First

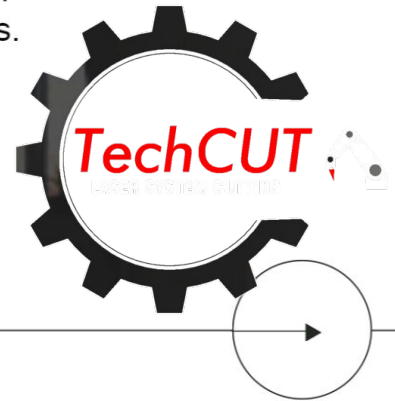

- The first day at work was very interesting. We received instructions from our mentor Zoran, who was with us the entire time. On the initial day, we not only learned how to initiate the CNC laser cycle and monitor temperature for troubleshooting purposes but also had the opportunity to get to know Zoran better. Additionally, we didn't encounter any communication issues, which made the learning process smoother.

We had the opportunity to learn how Zoran personally assembled and programmed CNC lasers, the workshop, bending machines; how he programmed and initiated the entire setup. As for how he started the company, Zoran began with a passion for CNC technologies and bending machines. In the initial stages, he dedicated significant effort to establish the workshop, acquire necessary equipment, and recruit skilled individuals for his team. He developed a strategic plan for the company, expanding its capabilities in CNC lasers, bending machines, and workshops.

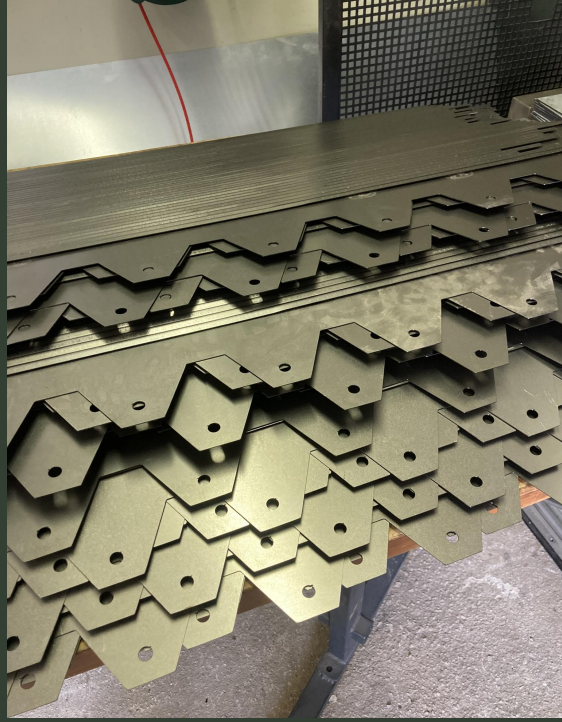

In terms of his work, Zoran is known for his dedication and efficient management of the workflow, contributing to the company's success. In his free time, he continues to express interest in technological innovations and keeps an eye on trends in engineering. His commitment to both work and personal pursuits has earned him respect and recognition in both professional and personal spheres.

DAYS AT WORK

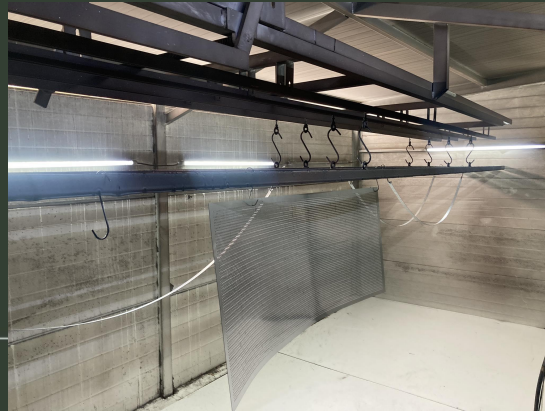

- As the days passed, we began to understand the details of the CNC lasers better.
- We became more efficient at quickly setting up and, in the end, cleaning and performing maintenance tasks.
- Later, we moved on to CNC bending, where we learned how to properly set the bending path and operate the machine. We also had little lessons on hydraulics.
- On the CNC bending machine, we bent sheets that we had cut using the CNC laser.

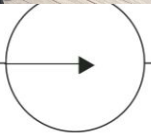

DAYS AT WORK

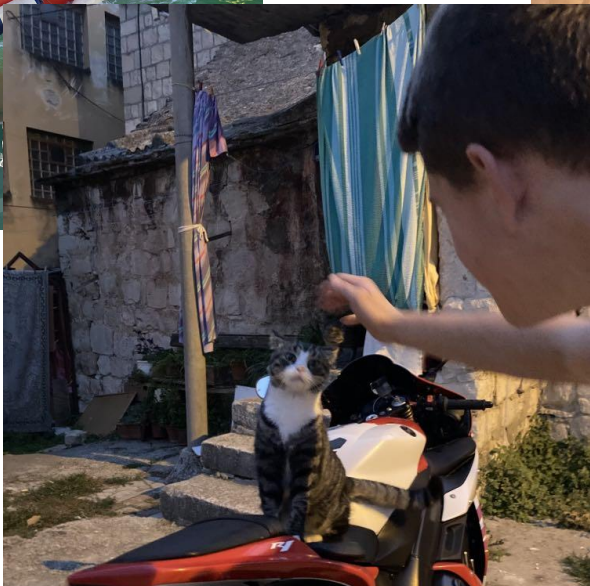

- I had the valuable opportunity to observe and learn the intricate process of powder coating. Witnessing the application and transformation of materials through this method provided me with insights into the precision and skill involved in achieving a durable and high-quality finish. It was particularly meaningful for me as it marked the conclusion of my involvement in the production process.

OUR FREE TIME

We spent our free time by exploring city Split, swimming in nearby beaches and over the weekend, we visited Makarska and Omiš, where we had a boat trip. On Sunday, we went to Krka National Park and Šibenik.

THE END OF OUR STAY

Our stay in Split was marked by a gathering of all the students on the final day. We came together for a meeting where certificates were distributed to each participant. It was a special moment, symbolizing successful completion of the program. As we received our certificates, it served as a testament to the experiences and knowledge gained during our stay. The event provided an opportunity for reflection, gratitude, and farewells to Split and the memories we created together.
